An examination of contexts for reading assessment. Carl Braun, Barbara J. Rennie, and Christine J. Gordon, 283–289.

F

Factors that influence continuing motivation. Naomi O. Story and Howard J. Sullivan, 86–92.

Florida performance measurement system: An example of its application. Donovan Peterson, Jeffrey Kromrey, Theodore Micceri, and B. Othanel Smith, 141–148.

G

Gender bias in superintendent selection: A projective analysis. Thomas Wiggins and Catherine Coggins, 115–120.

Generating self-questions after reading: A comprehension assist for elementary students. Beth Davey and Susan McBride, 43–46.

Goal setting and performance among elementary school students. Betty Jane Punnett, 40–42.

Grading problems: A matter of communication. James Raths, Madonna Wojtaszek-Healy, and Connie Kubo Della-Piana, 133–137.

H

Home influence on school learning: Direct and indirect effects of parental involvement on high school grades. Paul G. Fehrmann, Timothy Z. Keith, and Thomas M. Reimers, 330–336.

I

The impact of staff development on implementation and student achievement. James F. Donovan, David A. Sousa, and Herbert J. Walberg, 348–351.

Increasing prose recall of learning disabled and reading disabled students via spatial organizers. Margo A. Mastropieri and Ellen E. Peters, 272–276.

The influence of supervisory training for cooperating teachers on preservice teachers' development during early field experiences. D. John McIntyre and Joyce E. Killian, 277–282.

L

Level of planning skill as a predictor of variations in computer competency among intellectually gifted and non-gifted children. Sonja C. Grover, 173–178.

M

Measuring children's attention span: A microcomputer assessment technique. Virginia Murphy-Berman, Gregg Wright, and Jon Rosell, 23–28.

Microcomputer technology in educational environments: Three case studies. Richard A. Diem, 93–98.

N

Notetaking by junior high students. Burke H. Bretzing, Raymond W. Kulhavy, and Linda C. Caterino, 359–362.

P

Perceived teaching problems, self-efficacy, and commitment to teaching among preservice teachers. Ellis D. Evans and Margaret Tribble, 81–85.

Predicting first-grade students' writing achievement using the Canadian readiness test and selected measures of cognitive development. Lloyd O. Ollila, Betty Collis, and Larry D. Yore, 47–52.

R

Relations between word knowledge and comprehension: Offerings to scholastic aptitude test performance of seniors in high schools. David K. Sinha, 5–9.

Resource utilization relative to students' achievement in and attitude toward science. Peter Akinsola Okebukola and E. Ola Adeniyi, 220–226.

S

Scholastic aptitude and achievement as predictors of performance on teacher competency tests: A further investigation. Michael E. Kerr, Sidney A. McPhee, and Paul Kleine, 266–271.

Some effects of training on the competence of beginning teachers. Mark Dewalt and Donald W. Ball, 343–347.

Student perceptions of preferred classroom learning environment. Daniele B. Byrne, John A. Hattie, and Barry J. Fraser, 10–18.

Student teachers and classroom authority. Drew Tiene and Steven Buck, 261–265.

T

Teachers' special education decisions: Does test information make a difference? E. Scott Huebner, 202–205.

Three studies of predicted gender differences in processes of word reading. G. Brian Thompson, 212–219.

To cooperate or not to cooperate in CAI: That is the question. Zemira R. Mevarech, Dafna Stern, and Irit Levita, 164–167.

U

Underlining performance outcomes in expository text. Jay Blanchard and Vincent Mikkelson, 197–201.

Using a computer-based error analysis approach to improve basic subtraction skills in the third grade. Howard Drucker, Susan McBride, and Charles Wilbur, 363–365.

W

The work behavior of elementary school teachers. Brad Chissom, 248–253.
